## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, drawn to field-installable fusion optical fiber connector kit that includes different elements of the kit , classified in class 385, subclass 134.
- II. Claims 25-28, drawn to a method of field-installable fusion optical fiber connector including the steps of supplying an optical fiber for splicing with the fiber optic stub classified in class 385, subclass 95.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the group invention I can be used for optical communication and/or fusing an optical waveguide to a lens or similar optical devices rather than to an optical stub as claimed in invention II.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

**This application contains claims directed to the following patentably distinct species of the claimed invention:**

IA) claims 1-9 and 17-24 are drawn to field-installable fusion optical fiber connector kit including a ferrule bock subassembly and a splice cover handling block subassembly assembly shown in fig 13.

IB) claims 10-13 are drawn to field-installable fusion optical fiber connector kit including a ferrule bock subassembly and a container having a hinge shown in fig 1-4.

IC) claims 1-9 and 17-24 are drawn to field-installable fusion optical fiber connector kit including a splice cover handling block subassembly assembly shown in fig 5.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Carroll on 2/5/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
